

## DESCRIPTION

The attached .csv contains 79 responses to an online survey of MTurkers. We asked a variety of demographic questions, and six questions drawn from PEW survey questions about technology use and politics. These data were collected for an exercise during RSF's Summer Institute for Computational Social Science.

A few notes about the survey procedure. We included two questions as 'attention checks' (Q12 and Q13). The questions were organized into two blocks (substantive questions, and demographic questions). Both the order of these blocks and the ordering of questions within these blocks was randomized.

This survey went live with an error, which meant that it had to be re-administered. The 79 responses in the attached .csv are observations which were deemed complete, and include some responses from the first wave and all responses from the second wave. We have not included around 30 first wave respondents who were accidentally given a truncated version of the survey.

The survey was administered by Rochelle Terman, Matti Nelimarkka, Peter Krafft, Ridhi Kashyap, Connor Gilroy, Elliott Ash, Adaner Usmani
